Multi-Year Revenue and Expenditure Forecast Scenarios

Multi-Year Revenue and Expenditure Projections

Multi-year revenue and expenditure projections have been developed as estimates of future City surpluses and shortfalls in order to examine how decisions made in the current budget could affect the City's future financial situation in a variety of potential revenue scenarios.

The tables and graphs on the following pages show the budget surpluses or shortfalls that would occur over the next ten fiscal years as a result of low, medium, and high revenue growth scenarios relative to projected expenditures. All estimates include policy changes included in the City Manager's Proposed FY 2013 budget.

Resolution 2480

Resolution 2480, approved by Council in November, 2011, requires a special analysis from the City Manager to show expected revenues and expenditures. The analysis included in the Approved budget must contain:

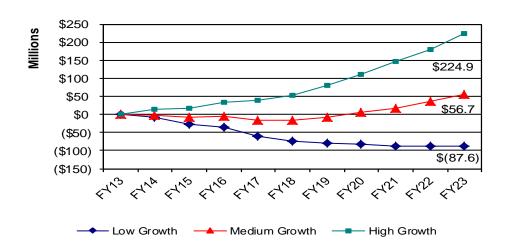

- a. Revenue estimates at the same level of detail as shown in the long-range forecast section of the budget document, including three forecast estimates high, mid, and low level.
- b. Revenue estimates that assume the same tax rates as those prepared for FY 2013 in the base budget.
- c. Expenditure estimates at the same level of detail as provided in the long range forecast section of the budget document.
- d. A detailed estimate of the impact in FY 2014 of any recommended expenditures in the FY 2013 base budget.
- e. The impact on FY 2013 revenues and expenditures of any of the options for additional operating and CIP expenditures approved under the authority of section 11 of the resolution which allows options for additional operating and budget expenditures above the base budget.
- f. A general discussion of the types of actions that might be necessary to balance the FY 2014 budget if there is a projected deficit for that year.

Multi-Year Revenue and Expenditure Projections

Balancing the Budget in FY 2014 In the City's mid-range estimate for revenues and expenditures, the FY 2014 budget forecast includes a shortfall of approximately \$1 million. Using the mid-range forecast revenue increases are projected to total 4.1% on average over the next ten fiscal years, while expenditures are projected to increase by 3.5%. The worst case forecast for FY 2014 is a \$9.1 million deficit, while the best case forecast scenario is a \$13.2 million surplus.

In order to balance the FY 2014 budget, it will probably be necessary again to do a combination of revenue and tax increases and expenditure reductions. The exact balance between the two types of actions would be determined by Council. In recent years, the City increased the real estate tax in part to compensate for decreases in real estate assessments. The city also increased other taxes where it has the authority such as the meals tax, transient lodging tax, and established an admission tax. The City has also made an effort to match fees and revenues to the costs of services. On the expenditure side, the City has reduced expenses by cancelling or deferring salary increases, reducing staff, and increasing city employee's cost share of benefits such as medical insurance. In some cases, the City has eliminated lower priority services and reduced service levels. The City has deferred capital projects; however, in reality maintaining existing public facilities and infrastructure is a high priority and a need exists to improve or expand some facilities or infrastructure. Lastly, the City could defer pension and OPEB contributions or tap the City's fund balances heavily, although these actions are likely not be recommended. They would be financially unsustainable and a threat to the City's Triple A bond ratings.

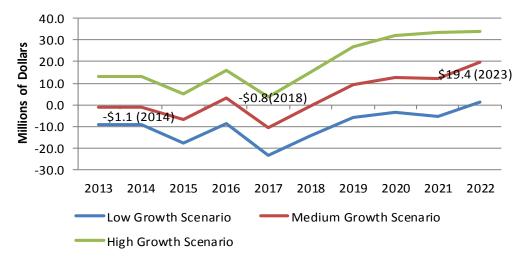

Multi-Year Revenue and Expenditure Projections

The graph below shows the annual change in budget gap projections. Assuming the budget is balanced each year, this chart shows the deficit or surplus that occurs in the succeeding year. According to the forecast model, under the high growth scenario, the annual gap will disappear next fiscal year. Under the medium growth scenario, the gap will disappear in 2019, and under the low growth scenario the gap will disappear in 2023. The medium and low growth scenarios show gradually narrowing gaps. The rate at which the gaps close depends mostly on the rate of growth in real estate assessments.

Change in Budget Gap Projections

Multi-Year Revenue and Expenditure Projections

Impact of FY 2013 policy changes on the FY 2014 budget

Resolution 2426, passed by City Council in November, requires the City Manager to provide a detailed estimate of the impact in FY 2014 of recommended expenditures in the FY 2013 base budget. The chart below shows the impact of expenditure changes to the FY 2013 budget on FY 2014 expenditures. All changes are included in the long-term forecast models.

Revenue Growth Scenarios

Three different scenarios of revenue growth have been developed for the period of FY 2013 through FY 2023 based on varying assumptions about the rate of increase for each of the revenue categories listed below. Each scenario is based on Proposed FY 2013 tax and fee rates. All projected increases over the next six years are generated by economic growth or the impact of inflation on goods or services that are taxed. In the low growth scenario, the real estate market is assumed to recover slowly; in the high growth scenario, real estate is expected to resume an slightly below average rate of growth. In the medium growth scenario, it is projected that real estate assessments will grow below the historic average rate of about six percent. In the long run, for the budget to come into balance, revenue growth must exceed the projected 3.5% rate of expenditure growth.

	Low	Medium	High
General Fund Revenue Categor	Growth	Growth	Growth
Total Weighted Growth Rate	2.6%	4.1%	5.7%
Real Estate Property	3.6%	5.5%	7.5%
Personal Property	1.2%	2.2%	3.2%
Penalties & Interest	0.0%	1.0%	2.0%
Local Sales	1.0%	2.0%	3.0%
Utility	1.0%	2.0%	3.0%

Restaurant Food	2.5%	4.0%	4.5%
Other Miscellaneous Taxes	1.5%	2.0%	2.5%
Licenses, Permits and Fees	1.0%	2.0%	3.0%
Fines and Forfeitures	0.5%	3.0%	1.5%
Use of Money and Property	1.0%	3.0%	5.0%
Charges for Services	2.0%	3.0%	4.0%
Intergovernmental	1.0%	1.5%	2.0%
Miscellaneous Non-Tax	0.0%	1.0%	2.0%

Expenditure Growth Scenario

For all scenarios, the City assumes a growth rate in expenditures of 3.5% per year. The model assumes no market rate adjustment. Non-personnel costs are generally expected to rise at their ten year average with the exception of Contractual Services, Utilities, Leases and Rentals, and Subsidies and Contributions. These expenditures were reduced by half in FY 2012 to account for increasing City efficiency and recently lower rates of inflation.

Expenditure Category	Assumption
Total Average Expenditure Growth	3.5%
City Personnel	
Market Rate Adjustment	0%
Step	1.6%
Health Care Increase	8.0%
City Non-Personnel	
Contractual Services	0.7%
Internal Services	1.5%

^{*} Amounts here do not capture Potomac Yard financing or expenditures. Potomac Yard is not inclued in forecasted years as it is a dedicated revenue source.

Note: In reality, the projected deficits would not occur. Actions would be taken to reduce expenditures or increase revenues.

^{*} Amounts here do not capture Potomac Yard financing or expenditures. Potomac Yard is not inclued in forecasted years as it is a dedicated revenue source.

Note: In reality, the projected deficits would not occur. Actions would be taken to reduce expenditures or increase revenues.
